

## Introducing the newest members of the Ecoventure Team!

May 25, 2017

Ecoventure is committed to quality and unparalleled customer service in all aspects of our business. We have a team of dedicated, positive and successful people and with excitement, we welcome three strong new members. We are convinced that they will add another layer of success to our already vibrant group.

### **Jim Burke, P.Ag.**

Mr. Jim Burke is a Professional Agrologist with over twenty five years of experience in the environmental arena. He joins Ecoventure as a Senior Soil Scientist/Senior Program Manager. He possesses diverse field and office management skills. His work experience includes working on and managing multi-disciplinary teams of subject specialists to reclaim large Oil and Gas industry disturbances. His most recent experience was with Cenovus Energy Inc. where he was a Senior Environmental Advisor for the conventional Oil and Gas operations area of grasslands (Brooks to Drumheller area) and previously as the Senior On-Site Environmental Compliance Advisor for the Christina Lake SAGD facility and associated projects, responsible for spill clean-up, field evaluation, field auditing and government compliance with governmental AEPEA environmental regulations. Prior to Cenovus, Jim has extensive experience both as a consultant and working within the industry, managing contaminated sites cleanup, reclamation, pre-disturbance assessments for well sites, oil and gas facilities which included large upstream and midstream projects.

### **Lisa Popek, P.Ag.**

Ms. Lisa Popek is a Professional Agrologist with over ten years of experience as a groundwater and air analyst in the Oil and Gas industry. Lisa joins Ecoventure as a Senior Professional Agrologist and Regulatory and Approvals Coordinator. At her previous employment, over time her role grew from environmental reporting to the overall stewardship of the company's environmental program. Lisa's job responsibilities have included management of the groundwater and remediation program, Alberta Environmental Protection and Enhancement Act and Water Act approval requirements, National Pollutant Release Inventory reporting and Fugitive Emissions, pipeline release response, and Phase I Environmental Site Assessment report and Reclamation Certificate Application preparation. The role required effective communication of results, and coordination of efforts across numerous internal and external bodies (Drilling, Operations, External Consultants, and Government Regulators to name a few).

**Wayne Reti, P.Eng.**

Mr. Wayne Reti is a Senior Professional Engineer with fifteen years direct environmental consulting experience in the Oil and Gas, Agricultural and Commercial Liability Management sectors, and with twenty years managing projects. Wayne joins Ecoventure's Assessment and Remediation Team as a Senior Technical Lead and Program Manager. Wayne has diverse practical skills combined with a solid understanding of project management within the multi-disciplinary functions of the environmental industry, and an acumen for client service and team coordination/leadership. He has had the opportunity to work with and lead multi-disciplinary environmental teams, and manage and lead field activities on multiple projects with the Oil and Gas/Environmental, Agricultural, Forestry and Construction industries from British Columbia to Manitoba.
